UNITED STATES EXPORTS OF DOMESTIC MERCHANDISE
(Tabulation of Quarterly BC Summary Records)
COUNTRY OF DESTINATION BY SUBGROUP BY COMMODITY

Calendar Year 1961

COVERAGE: Export statistics include government as well as non-government shipments to foreign countries. The export statistics, therefore, include Mutual Security Program military aid, Mutual Security Program economic aid, and Department of the Army Civilian Supply shipments. Shipments to United States armed forces and diplomatic missions abroad for their own use are not included in export statistics. Merchandise shipped in-transit through the United States between foreign countries is also excluded. United States trade with Puerto Rico and United States possessions is not included in this report, but the export trade of Puerto Rico with foreign countries is included as a part of the United States export trade. Values, in general, are based on selling price, and include transportation and other costs to the United States port of exportation. Further information is contained in the "General Explanation" in foreword of Report No. FT 410. For complete statement, see the foreword to Foreign Commerce and Navigation of the United States.

The export statistics presented in this tabulation are compiled in accordance with Schedule B commodity classifications. Effective with the statistics for January 1960, the export figures reflect fully compiled data for shipments individually valued $500 and over combined with estimated data for shipments valued $100-$499 based on a 10 percent sample of such shipments to Canada and a 50 percent sample of such shipments to other countries. For a further description of the sampling procedures and information regarding the reliability of the estimated data, see the foreword of Report No. FT 410. (Note: Total sample card count for the Continent of North America is not shown in this tabulation as the estimated data for $100-$499 shipments to this continent are based on two different sample ratios - 10 percent for Canada and 50 percent for other countries.)

For security reasons, detailed commodity and country of destination data are not shown in export statistics for certain selected commodities, referred to as Special Category commodities. Therefore, the country totals shown in this tabulation represent exports to the respective countries exclusive of Special Category commodities. Summarized information on exports of Special Category commodities is shown at the end of this tabulation with the country code 899. (Note: Country of destination detail is presented in this tabulation for shipments of certain aviation fuels, aviation engine lubricating oils and jet fuels, Schedule B commodity numbers 50161, 50163, 50180 and 50400, formerly classified as Special Category Type 2 commodities, for which restrictions have recently been removed by the security authorities. Therefore, the summarized data on exports of Special Category commodities shown at the end of this tabulation do not include information for these commodities. The inclusion of data for any exports of these commodities in the country totals in this report may result in differences between these totals and the sum of the previously published monthly country totals, since all the monthly country totals excluded these commodities. Information as to the availability of more detailed statistics on the declassified commodities for prior periods will be announced in a future issue of Report No. FT 410.) Further information on Special Categories and a list of commodities included is contained in the April 1958 issue of the Notes. Except for the above-mentioned Schedule B commodity numbers, 50161, 50163, 50180 and 50400, this list is still in effect.
